

Pregnancy and baby loss: providing support in community settings

Support and compassionate care training for anyone working outside of a hospital setting

- 7 hours / 3.5 hours - delivery via in-person or online workshops
- 2 hours - online delivery

Overview

This training is facilitated by a specialist bereavement care trainer and is ideal for people who work with those who have experienced pregnancy or baby loss. It is an excellent opportunity for anyone looking to increase their confidence, further their knowledge and provide compassionate care and support. This is skills-based training with a variety of opportunities to learn through case studies and skills practice, and explore support throughout the grief journey.

The list of outcomes for participants below is based on a full-day workshop and will be modified to fit the length of the session you require and the method of delivery.

- Learn about the experience of pregnancy, birth and the death of a baby
- Explore the impact of pregnancy and baby loss on the wider family
- Discover how culture, community and identity influences the experience of loss and the grief journey
- Develop an understanding of the impact of grief, bereavement and trauma on the whole family, and the impact on their mental health
- Consider the skills required to communicate empathically, building confidence in using the right words
- Explore the impact of loss on a subsequent pregnancy
- Reflect on your own boundaries and the impact of working with baby loss on your wellbeing

Following the training all participants will receive a copy of the materials used and links to various helpful tools and resources.
